FIS CANNED AIR MICRO DUSTER

Part #: F1-1007S

FEATURES

- Contains 10 oz. of 100% pure difluoroethane
- Blasting power exceeds 70 psi
- Filtered to 0.2 microns

The FIS Canned Air Micro Duster is a time saving cleaning tool with a unique variable pressure trigger that lets you control the dusting pressure. Before removing a fiber optic connector for inspection or cleaning, make sure the area around the connector is free from dust. The FIS Micro Duster includes an extension nozzle to provide a powerful blast of air to remove particles from areas that are otherwise inaccessible.

The FIS Canned Air Micro Duster contains 100% pure difluoroethane, a colorless, odorless, moisture-free, ozone-safe propellant that can produce pressure in excess of 70 psi.

SPECIFICATIONS

Net Weight	.85 lbs.
Dimensions	7″ x 3″ x 3″
Controls	Momentary on/off switch for light source, fine focus control wheel
Adapter Interface	2.5mm universal adapter included, other types available
