

ZM5101

General Purpose  
Z-Wave® SiP Module

The ZM5101 combines a Z-Wave SD3502 SoC (with a built-in microcontroller and Z-Wave RF transceiver), crystal, and passive RF components within a single 8mm x 8mm module. This makes the ZM5101 ideal for

small-footprint, single microcontroller products, such as thermostats, remote controls, lighting control, and USB sticks.

The ZM5101 addresses the need for increasingly user-friendly and feature-rich Home Control applications by providing 128kB Flash and 16kB SRAM. The built-in keyscanner and infrared controller are ideal building blocks for implementing a Universal Remote Control that supports both learning and sending IR codes, as well as Z-Wave commands. The ZM5101 provides hardware-assisted frequency agility, enabling the module to switch away from a noisy channel without communication or software overhead. Furthermore the very-low sleep current of the ZM5101 addresses the growing need for longer battery life, allowing existing Z-wave products to experience up to double the battery life of current products.

#### KEY BENEFITS

- Integrated RF module for fastest time-to-market
- High GPIO pin count
- Small form factor: 8mm x 8mm

#### TARGET APPLICATIONS

- Remote controls
- Door locks
- Lighting control
- Thermostats
- Single-chip applications

#### KEY FEATURES

- Integrated CPU and RF transceiver
- 128kB Flash, 16kB SRAM
- 1000 step dimmer (TRIAC/FET)
- 4-channel 12-bit rail-to-rail ADC
- 4-channel 16-bit LED PWM
- 30 GPIOs
- Keyscan controller up to 128keys
- Infrared controller with both RX and TX
- USB full-speed device, SPI, UART, PWM
- Hardware AES 128 security engine
- 1µA sleep mode
- 9.6/40/100 kbit/s data rates
- Regional modules for 868/908/921 MHz
- Hardware-assisted frequency agility with up to 3 channels
- ZM4101 pin-compatible
- Power supply: 2.3-3.6V
- QFN56 8mm x 8mm
- Battery monitor

ACTUAL SIZE  
8mm x 8mm

### ABOUT SIGMA DESIGNS

Sigma Designs is a leading provider of system-on-chip (SoC) solutions used to deliver entertainment and control throughout the home:

Media Processing, Smart TV, Video Encoding, Home AV Networking, Video Processing, Home Control

These SoCs are supported with board-level reference designs, sophisticated system software, and technical documentation to form a complete solution for a variety of set-top boxes, smart TVs, consumer electronics, AV network devices, and home control systems.
