DUAL, TWO-PHASE COMPLEMENTARY OUTPUT

HS-2150/2160 Series
HS-2250/2260 Series
62.5 kHz-20.0 MHz

DUAL INDEPENDENT

HS-2400 Series
HS-2420 Series
500 kHz-36.0 MHz

HS-2150/2160
HS-2250/2260
HS-2400/2420

Description

The HS-2150/2160 Series of quartz crystal clock oscillators, using hybrid technology, complements our HS-100/350 Series oscillators by providing two-phase complementary TTL or CMOS compatible output capability. HS-2150 is for TTL outputs. HS-2160 is for CMOS outputs.

The HS-2250/2260 Series of quartz crystal clock oscillators use hybrid technology to provide both clock output (Pin 1 = F_{CK}) and clock output divided by N (Pin 8 = F_{CK}/N)* in the same package. Thus two distinct, discrete, synchronous TTL or CMOS compatible clock sources are available in the same package. The HS-2250 Series is TTL compatible; the HS-2260 Series is CMOS compatible.

*N = 2, 4, 8, 16, 32, or 64

The HS-2400 Series of quartz crystal clock oscillators are general purpose, TTL compatible oscillators. HS-2420 Series oscillators are general purpose MOS compatible devices (4000 Series, CMOS, 74C, 74HC, and NMOS driving up to 15 pf). Both series offer two independent output frequencies, not related by division or multiplication to each other.

Suggested Applications

HS-2150/2160 Series oscillators are intended for applications such as differential receivers where a complementary output is required. HS-2250/2260 Series oscillators are intended for complex digital systems applications requiring two control frequencies, one divided from the other.

HS-2400/2420 Series oscillators can be used for microprocessor timing control, instrument timing control, and TTL or CMOS based systems.

Features

- Wide Frequency Range
HS-2150/2160 & HS-2250/2260
62.5 kHz to 20.0 MHz
- HS-2400/2420
500 kHz to 36.0 MHz for either output
- Case at electrical ground
- User specified tolerance, from $\pm 0.0025\%$
- Low power consumption
- High shock resistance, to 3,000 G's
- Occupies half the board space of two separate oscillators
- All metal resistance weld, hermetically sealed package, offering RFI shielding. Designed to withstand standard wave soldering operations.

Consult factory for higher frequency requirements.

Output Waveforms

	TTL (HS-2150)	CMOS (HS-2160)
V_{CC} Max.	2.4 V	V_{DD} Max.
	1.4 V	$V_{DD} - 0.2$ V
	0.4 V	$0.5 V_{DD}$
V_{OL}	0.0 V	0.2 V
	0.0 V	0.0 V

	TTL (HS-2250) (HS-2400)	CMOS (HS-2260) (HS-2420)
V_{CC} Max.	V_{OH}	V_{DD} Max.
	2.4 V	$V_{DD} - 0.2$ V
	1.4 V	$0.5 V_{DD}$
V_{OL}	0.4 V	0.2 V
	0.0 V	0.0 V

Crystal Clock Oscillators

Specifications

PARAMETER	CONDITIONS	MINIMUM	MAXIMUM
General Characteristics			
Supply voltage (V_{CC}, V_{DD})	Supply	4.5 V	5.5 V
	Breakdown	-0.5 V	7.0 V
Supply current (I_{CC}, I_{DD})	Supply	—	50 mA
			60 mA (HS-2400/2420)
Operating temperature (T_A)	—	0° C	70° C
Storage temperature (T_S)	—	-55° C	+125° C
Output current (I_O)	High or low level	—	± 25.0 mA
Lead temperature (T_L)	Soldering, 10 s	—	300° C
Output Characteristics			
Frequency	—	62.5 kHz	20.5 MHz
		500 kHz	36.0 MHz (HS-2400/2420)
Tolerance	User specified	± 0.0025%	—
Symmetry	TTL @ 1.4 V	40/60%	60/40%
	CMOS, @ 0.5 V_{DD}	40/60%	60/40%
	Optional	45/55%	55/45%
	@ ≤ 18.0 MHz (HS-2400/2420)	—	—
Logic 0 (V_{OL})	TTL, driving equiv. load	—	0.4 V
	CMOS, driving equiv. load	—	0.2 V
Logic 1 (V_{OH})	TTL, driving equiv. load	2.4 V	—
	CMOS, driving equiv. load	—	—
Logic 0 (I_{OL} sink)	TTL, driving equiv. load	$V_{DD} - 0.2$ V	16.0 mA
	CMOS, driving equiv. load	—	600 μ A
Logic 1 (I_{OH} source)	TTL, driving equiv. load	—	0.4 mA
	CMOS, driving equiv. load	—	600 μ A
Rise & fall time (t_r, t_f)	TTL, @ 0.4 to 2.4 V	—	10 ns
	CMOS, @ 10% to 90% of V_{DD}	—	10 ns
Start time (t_{on})	@ 0.9 V_{CC} or V_{DD} to + 2.0 V at Pin 1 or Pin 8	—	5 ms
	2ms (HS-2400/2420)	—	—
Propagation delay	<u>HS-2150/2160</u>		
	TTL, @ 1.4 V_{CC} , Pin 8 output relative to Pin 1 output	—	18 ns
	CMOS, @ 0.5 V_{DD} Pin 8 output relative to Pin 1 output	—	18 ns
	<u>HS-2250/2260</u>		
	TTL, @ 1.4 V_{CC} , Pin 8 output relative to Pin 1 output	—	51 ns
	CMOS, @ 0.5 V_{DD} Pin 8 output relative to Pin 1 output	—	51 ns

Options

- Gull wing surface mount package available on all dual, two-phase complementary output oscillators. (Dimensions-see page 35).

NEW PRODUCTS

In our continued effort to provide quality products to meet the needs of the changing electronics market, NEL is in the process of developing several new products.

Among these are:

TTL/CMOS Oscillator

Frequency range 70 to 100 MHz. User tolerance available from $\pm .005\%$.

3-State CMOS/TTL

Frequency range extended to 80MHz. User tolerance available from $\pm .005\%$.

Z80/8000/80A/80B Oscillator

Frequency range on HS-380/2890 Series extended to 40.0MHz. User tolerance available from $\pm .0025\%$.

Programmable Video Clock Generator

For use in the computer graphics, disk drive (zone locator) and fiber optics markets.

This product simplifies operations by using phase-locked loop techniques to generate, from the crystal oscillator, all the necessary clocks used in a typical graphics system.

OSCILLATOR METAL HALF PACK AND SURFACE MOUNT DIMENSIONS

HA Series

Pin number 4 connected to case.

The metal half pack oscillator is available in TTL, CMOS, and Z80 logics. See options on pages 17, 20, 29, and 33 for details.

SA Series

Pin number 4 connected to case.

Seating plane = $.005 \text{ Max. (.127)}$
Wire leads to be formed to a 90° angle.

SM Series

Pin number 7 connected to case.

Seating plane = $.005 \text{ Max. (.127)}$
Wire leads to be formed to a 90° angle.

Dimensions are for reference only, inches (mm).
