

**A
TOUCH
BETTER**

- Products are available from flat membrane, non tactile membrane circuits with embossed overlays, selective textures and rigid stiffener LCD windows. RFI/EMC shielding and LED also available. SMD components can also be placed on mylar circuit or connector for tail termination.

Non tactile

Mylar Dome

Metal Dome

Short Description

- Offers greatest number of operating cycles

- High operating cycles with tactile feedback

- Tactile feedback

Advantages

- Low cost
- Secret key option
- IP65

- Cost effective with tactile feel
- IP65

- Greater tactile feel
- IP65

Considerations

- No tactile feedback

- Not as specific click as with metal dome

- Higher cost

Key Tech. Data

No. of cycles [#]
Actuating force [g]

- > 5millions
- 57 - 284

- > 1millions
- 170 - 397

- > 1millions
- 170 - 397

Minimal Customer Input

- 2D Drawing (dxf. pdf) Gerber
- AutoCAD
- Tail termination and type

Our Strengths

- Quick turn around prototypes
- ISO9000/ ISO1401 UL Certified
- Standard 12/16/20 key available
- Latest production equipment and test instruments
