

**A  
TOUCH  
BETTER**

**One layer for  
light control**

**Two layers for  
night design**

**Three layers for  
night design**

**Short  
Description**

- Decorative surface or light control
- Coat parts with laser ink
- Laser etch ink layer to get shape or symbol
- Clear (matt to glossy) Sealplast abrasion resistant top coating

**Advantages**

- High design flexibility
- Save cost of plastic
- Night design
- Multicolor key with different symbols can be next to each other
- Abatek has best protective coating in the market – see fact sheet Sealplast coating

**Considerations**

- White color as 1st layer gives better night design appearance
- Right milkiness of silicone rubber for soft night design
- Decision on printing vs. coating for many layers
- Control force with many ink layers
- Number of layers drive cost

**Key Tech. Data**  
Coating thickness

20 micron per layer

**Minimal  
Customer Input**

- 2D-Drawing (dxf; pdf)
- 3D Database (igs; step)
- Artwork (eps; dxf)
- Glossiness coating

**Our Strengths**

- Worlds best coating
- High quality lasers
