Installation Note SN A-30

To: ACK Technologies Inc. model A-30 encoder distributors and installers

The model A-30 encoder Mod levels 0 through 9 utilize the same mounting tray and the same 15 pin Sub D connector and are directly interchangeable between mod levels.

On mod level 5 and above (serial number 85,000 and above) only pin 8 may be used for A+ power input. Please consult the manual when replacing a mod 3 and below encoders with a mod 4 and above encoder.
