

The MONITOUCH Hygiene Series

Medical & Pharmacy Industry

Maintaining a hygienic environment

MONITOUCH

HMI MONITOUCH Hygiene

It's now possible to maintain the hygiene of the panel surface. In creating a flat, seamless panel surface, this also prevents the accumulation of dust and bacteria in any crevices.

Acid based cleaning agents, chemical

High pressure water, steam

Oil, grease, shortening and animal fats

1 Tablet Connection

The MONITOUCH Hygiene series is equipped with VNC server function for remote monitoring and control of production directly from your tablet.

2 Database Connection

Machine data can be collected and saved within the database of the server, through the MONITOUCH Hygiene WLAN port.

Database
SQL etc.

3 VPN Connection

Our VPN remote access service enables support engineers to monitor and change screen programs from anywhere in the world.
