

Amglo Kemplite Laboratories

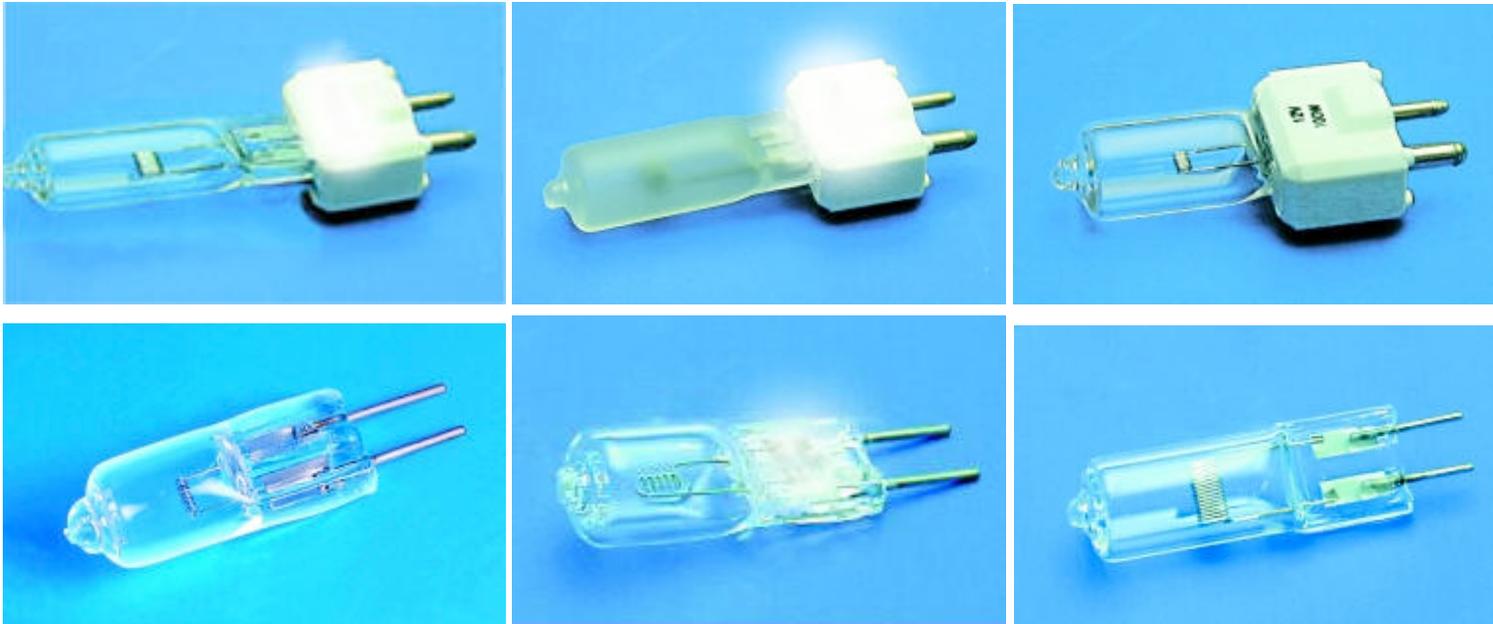

Specialty Medical Lamps Manufacturer

Amglo Kemplite Laboratories Inc. manufactures and markets lamps and related lamp components to customers with special requirements, that are not being met by large integrated lamp-manufacturing companies. Amglo's core technologies in lamp manufacturing are xenon and metal halide (HID) discharge lamps, and halogen lamps. Amglo's product diversity and flexible manufacturing process encourages full product customization to overcome many special challenges faced by operating room theater lighting manufacturers. Some of the advantages Amglo provides include:

- Amglo lamps are precisely designed to meet specific light output.
- Amglo designs lamps to meet tight color temperature (K) requirements.
- Amglo is capable of reducing halogen output drift to avoid equipment calibration error.
- Amglo in-house filament/electrode design technology enables quick turnaround.
- Amglo has the ability to perform all light measurements in our laboratory.
- Amglo meets the tight LCL requirements.
- Amglo special gas mixtures extend lamp life.

Amglo Kemplite Laboratories Inc. 8787 Enterprise Blvd. Largo FL 33773 Ph: (727) 812-2000 Fax: (727) 812-

Above Amglo lamps represent various styles currently supplied to OEM's in operating room theater lighting. Lamp wattage ranges from 20-watts to 250-watts and voltage ranges from 12V to 120V. Filament types include C-8, CC-8, C-6, CC-6, C-2V, CC-2V, and C-Bar designs. Lamp glass is clear or frosted. A variety of lamp bases are utilized including SC Bay, DC Bay, Bi-Pin, and special Ceramic.
