

Generate leads with Technical Paper Sponsorships?

Technical Paper Sponsorships enable you to generate highly-targeted leads in a single 30-day campaign or with the extended lead packages, to transform your library of papers into a long-term, sustained lead generation engine.

Through EETimes' Technical Paper Sponsorships, your company gains access to a powerful combination of email marketing services and premium Web site positioning to deliver your technical information to an interested audience within a focused timeframe. A Technical Paper Sponsorship is the best way to be sure your paper stands out in the library and also generates leads for you.

Pan European audience reach: EETimes connects you to a powerful audience of European registered users who access our site for specific information and on-going education and training.

Generate leads: Use a EETimes Technical Paper Sponsorship to generate timely leads by promoting your paper to a pan-European audience of electronics engineers and engineering managers for 30 days.

Increase brand awareness: Raise your product's profile, with highly-visible content within the EETimes Europe site network and in email newsletters, while measuring the success of your program with detailed lead reporting.

Material Specifications
