

Microwave Engineering Europe is the leading medium available both in print and digital format for reaching design engineers and management working in the RF, microwave and wireless industry in Europe. The magazine highlights the significant design methodologies, strategies and new products, engineers need, to gain a competitive advantage.

Each issue carries a balance of how-to editorial material through feature articles, news and new products for designers responsible for defining systems, selecting enabling technologies as well as hardware and software components.

Microwave Engineering Europe evolves with the fast paced RF and microwave markets, helping European engineers to stay at the forefront of their profession. As the demand for development in wireless products continues to grow, the

demand on engineers intensifies and time-to-market cycles continue to shorten. Today engineers need to be able to quickly source components and software as well as test equipment from the global market and Microwave Engineering Europe is where they go for such information.

The highest quality editorial in MWEE guarantees that the magazine plays a pivotal role in designers' and developers' jobs, updating them on the latest technologies and allowing them to make valued and informed recommendation and buying decisions.

The microwave-eetimes.com website together with the weekly newsletters deliver practical design techniques, daily industry news, how-to features and new product updates.
