

Korrvu® Packaging

Turn to Korrvu® Suspension, Retention and Compression Packaging for Clear Solutions to Your Packaging Needs

Innovative

Cost effective. Easy to use. Korrvu® packaging designs are engineered to satisfy your specific packaging requirements with unique benefits that are plain to see.

Unparalleled Product Protection

Korrvu® packaging safely holds your product in the

center of the shipping container. These engineered packaging solutions keep your product securely in place, protecting it from shock and vibration.

Showcases Your Product

Complement your product's appearance by combining outstanding protection and attractive presentation. Our proprietary, resilient, transparent films provide maximum visual appeal to make your package a protective shipper and an effective display merchandiser.

Versatile

If you ship a variety of similar sized items, chances are that the versatility and simplicity of Korrvu® packaging will accommodate a one-size-fits-many-products solution. Because a single Korrvu® design can accommodate similar products with varying shapes, you can reduce your packaging inventory.

Korrvu® packaging requires less storage space and uses a minimum of materials. In this case, Korrvu® packaging reduced the volume of packaging materials used by 78% while maintaining the same level of protection as the previous packaging.

Korrvu® packaging complements your product's appearance – combining outstanding product protection and attractive presentation.

Reclaim Storage Space

Korrvu® packaging stores flat, reducing storage and warehouse requirements. Because Korrvu® packaging requires no equipment installation, no significant capital investment is required.

Environmentally Sound

Korrvu® packaging contains at least 30% recovered paper fiber* and is readily recyclable in corrugated hydrapulping operations. Korrvu® packaging is RESY approved for recycling in Germany and is reusable for return shipments, minimizing waste at both ends of the distribution cycle.

** May contain post-consumer and post-industrial fiber.*

Packaging Solutions Engineered for Your Specific Needs

Korrvu® Packaging

provides award-winning solutions that meet today's packaging requirements. Using innovative materials and proprietary design techniques, Korrvu® packaging is a dynamic packaging resource that provides excellent product presentation, versatility, space savings and environmental excellence.

Korrvu® Suspension Packaging

suspends your product in the air space of the shipping container between two layers of highly resilient low-slip film. The patented design suspends your product away from impact, providing consistent protection for fragile products even after repeated drops.

Flexible film membrane stretches around various shapes and sizes allowing one pack to work for a variety of items.

Compression packaging provides blocking and bracing with great product presentation.

Korrvu® retention packaging can be designed to hold very thin products securely in the retention frame.

Korrvu® Retention Packaging

holds your product securely within its proprietary retention frame. This provides engineered protection for a wide range of products that require shock protection during the shipping cycle.

Korrvu® Compression Packaging

provides simple, fast and cost-effective blocking and bracing protection. Suitable for a wide range of products and applications, it also serves double duty as an attractive shipper and protective product display.

The essence of Korrvu® packaging is the strong, highly resilient low-slip film that surrounds the packaged product, protecting it from shock and vibration.

Korrvu® Suspension Packaging

High-Performance Protection Anyone Can See

Korrvu® suspension packaging protects even the most fragile items from the rigors of the distribution environment.

Korrvu® Suspension Packaging

provides high value or fragile products with unparalleled product protection throughout the shipping cycle – even after repeated drops. The tough and resilient suspension film retains its effectiveness for multiple use – including return shipments.

The flexible film membrane stretches to hold unusual shapes and provides excellent product visibility.

For higher volume packaging operations, Korrvu® suspension pop-up packaging is easy and fast.

**Korrvu® suspension packaging is easy to use and simple to assemble.
No extensive operator training is required.**

At the packaging station, the frame is assembled and placed in the box to suspend the product in the center of the container.

The top window is placed over the product, completely suspending the item between two strong, flexible, low-slip films.

The box is closed, creating tension that holds the product securely between the two suspension windows, protecting it from shock.

Korrvu® Retention Packaging

The Right Solution for a Wide Range of Applications

Engineered retention frame provides additional bottom cushioning for heavy and fragile items.

Korrvu® Retention Packaging provides a variety of engineered solutions for products that need protection from shock during the distribution cycle.

The merits of Korrvu® retention packaging's shock-absorbing designs go far beyond impact protection. Their transparent film membranes provide excellent visibility and product display.

For these applications, the flexible retention film accommodates a wide variety of spare parts and accessories.

Korrvu® retention packaging is a versatile, economic alternative to traditional packaging.

The side flaps fold upward, loosening the film and forming an "insertion pocket" for easy product loading.

The side flaps are folded down to tighten the retention film and hold the product securely in place.

The finished package is easily inserted into the carton and is ready for shipment.

Korrvu® retention packaging can be integrated with the outer carton and printed for an 'all in one' packaging solution.
