

# Introducing the All New **ASKG Receiver**

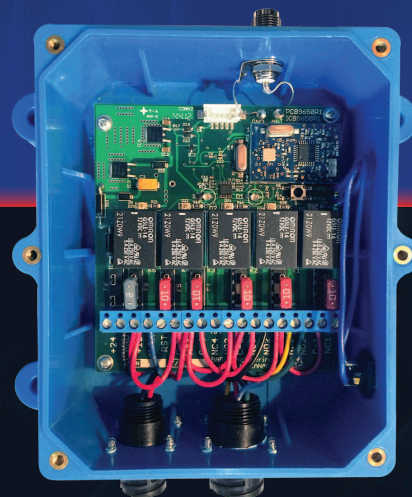

Back to basics, with a twist – the ASKG receiver combines user friendly pre-wired relay contacts with new age technology to provide better overall performance!

The ASKG receiver boasts up to four channel outputs including an additional output for query alarm and the ability to modify outputs to be active to ground or 12/24VDC as required.

Designed to be used as part of a system, the receiver can be used with **BASE Engineering's** ASKW, ASKF or ASKR handhelds.

## **Facts:**

Frequency of Operation . . .	433Mhz (ASK Only)
Power Supply . . . . .	12/24 VDC
Current Load . . . . .	Up to 10 Amps @ 12VDC per contact relay
Construction . . . . .	BASE's own custom water/dust resistant enclosure
Antenna . . . . .	Externally mounted antenna/coax included
Wiring connections . . . .	Pre-wired plugins
Diagnostics . . . . .	RF activity LED and Power On indication
Programming Modes . . . .	Up to 4 programmable channels including multiple modes: Latched, Momentary, Safety Latched, Channel Interlock, Channel Delay, Query (other custom OEM programming available upon request).
