Belimo Group current media release

Belimo achieves gratifying growth in sales and profits

The Belimo Group, a leading global manufacturer of electrical actuators for heating, ventilation and air-conditioning systems, can look back on a very successful financial year in 2005. Net sales in local currencies rose by some 12 percent in Europe, 11 percent in America and 8 percent in Asia/Pacific, contributing to a total increase of 11 percent. This growth, which in Europe and America greatly exceeded growth levels on the markets serviced by Belimo, reinforces the company's market leadership.

Net sales in Swiss francs were up by 10.8 percent to approx. CHF 280 million. Following the successful introduction of an entirely new generation of actuator products in Europe, Belimo was able to raise both sales and operating earning power in the second half of the year. A disproportionate rise in net profit is expected.

Belimo expects to enjoy a similarly high level of growth in 2006. Investment in research and development is to be stepped up considerably.

The Belimo Group will be publishing its definitive results and its Annual Report for 2005 on April 3, 2006.

The Belimo Group is a leading global manufacturer of innovative electrical actuator solutions for heating, ventilation and air-conditioning systems. The Group achieved sales of some CHF 280 million in 2005 and employs over 850 people. Information regarding the company and its products are available on the Internet at www.belimo.com.

BELIMO Holding AG shares have been traded on the Swiss Stock Exchange since 1995 (SWX: BEAN).
