

**Update 09/2016**  
Terminal control valves

# Building HVAC components

Belparts is specialized in the development, production and marketing of components for the automation of HVAC-systems in buildings. We design field components that exactly match market needs. Throughout the development process, we ensure functionality, quality and reliability.

Belparts produces field components for all areas of HVAC, whether production, distribution, or terminal control of heating and cooling, as well as ventilation. Whatever the HVAC-application, we have it covered.

Our field components are designed to be smoothly integrated with any Building Management System (BMS), Direct Digital Controller (DDC), Programmable Logic Controller (PLC), and Supervisory Control and Data Acquisition (SCADA) system.

## A leading player for more than two decades

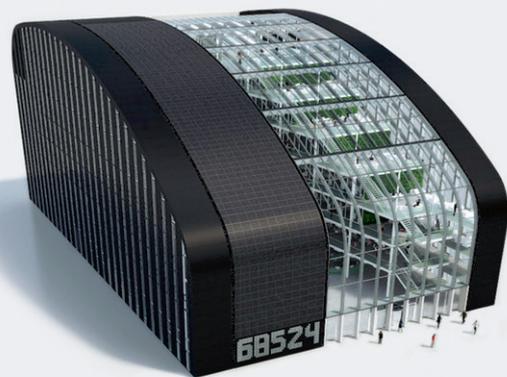

Belparts was established in 1987 by professionals from the HVAC-industry. Since then, we have developed a reputation for intelligent product design and reliable solutions. Our company has enjoyed a healthy success ever since its foundation.

## Market driven innovation

We constantly strive for product and system optimizations. Our engineers incorporate the latest proven technological developments into the design of new HVAC-components and understand how to combine high quality with product affordability.

## Shared competency and values

The Belparts staff shares a common passion for technology, product design, quality, and HVAC-applications. Each of our team members is both customer and results-oriented, and is trained to think 'innovation'. Integrity and responsibility are prerequisites for every employee.

## energetx

Belparts produces a broad range of components that save costs at every single point in your HVAC-system. By selecting the optimal component for each individual situation, considerable amounts of energy can be saved. Our **energetx**-range of products includes control valves, rotating valves, valve and air damper actuators, terminal control valves, and sensors.

## dynamx

Based on our revolutionary Dynamic Flow Networking (DFN) concept, our **dynamx**-valves adjust the flow of energy exactly to the desired conditions. This ensures that only the exact amount of energy is delivered at the right place and at the right time. The result is optimal comfort and reduced energy costs.

# energetx

## 6. Terminal control valves

<b>Actuators</b>	<b>8</b>
<b>2-port control valves</b>	<b>12</b>
<b>3-port control valves</b>	<b>22</b>
<b>4-port control valves</b>	<b>28</b>
<b>Multifunctional</b>	<b>32</b>
<b>PICV</b>	<b>36</b>

## Product key

The product identification key contains all essential data defining the unique features of the terminal control valve/actuator combination.

Example: type NV2D15.BA4007.02 X10

NV	2	D	15	BA	4007	.02	X10
Control valve				Actuator			

**Type of terminal control valve** (complete overview on next page)

**NV..** terminal control valve PN16  
**NVP..** terminal control valve PN16 with flat connections

**Number of ports**

**2** 2-port valve  
**3** 3-port valve  
**4** 4-port valve

**Mounting**

**D** valve body with threaded connection

**DN and Kvs value**

**15** DN15, with fixed Kvs value  
**15V** DN15, with settable Kvs value

**Type of actuator**

**BA** electrothermal actuator  
**10U** electric motor (example)

**Type of control signal**

**2007** AC 230 Volt On/Off + PWM (NC)  
**4007** AC 24 Volt On/Off + PWM (NC)  
**6547** AC 24 Volt Y: 2..10Vdc

**Conditioning of the wiring cable**

**00** without cable  
**-** wiring cable, length 1m (standard)  
**02** wiring cable, length 2m

**Special fonctions/versions/packaging**

**X10** packaging per 10 pieces

## Order reference

The Belparts terminal control valves can be ordered with a single order reference number. The selection table shows nominal size DN and Kvs value on the right page (odd page numbers). Do you want to order valve body and thermic actuator as separate parts, you will find all information required on the left page (even page numbers).

Please feel free to contact us for free selection and calculation support of the terminal control valves. We will be pleased to help you determine the most energy efficient solution.

## Product key

BA	4	0	0	6	00	01	-
basic version					features		

### Series

**BA** Belparts thermic actuator for terminal controls

### Power supply

- 1** AC 120 Volt
- 2** AC 230 Volt
- 3** DC 12 Volt
- 4** AC/DC 24 Volt
- 6** AC 24 Volt, modulating
- 7** DC 24 Volt, modulating
- 8** *available for later use*
- 9** AC 24 Volt, ECO

### Function & stroke

- 0** 4,0mm, 100N, normally closed (NC)
- 1** 4,0mm, 100N, normally open (NO)
- 5** 5,0mm, 100N, normally closed (NC)
- 51** 5,0mm, 100N, normally open (NO)
- 65** 6,5mm, 120N, normally closed (NC)
- 66** 6,5mm, 120N, normally open (NO)

### Special options for on/off versions BA6 or BA7

- 0** standard version (no special options)
- 1** without 'First-Open' function
- 2** with integrated end switch
- 3** *available for later use*

### Special options for modulating versions BA6 or BA7

- 0** *available for later use*
- 1** 0..10Vdc (100kOhm)
- 2** 10..0Vdc (100kOhm)
- 3** 2..10Vdc (100kOhm)
- 4** 2..10Vdc (100kOhm), with 'Stroke Adapt' function
- 5** split range 5..1Vdc
- 6** split range 6..10Vdc
- 7** *available for later use*
- 8** *available for later use*
- 9** FLEX version (operating range  $\Delta$ 0..10Vdc factory programmable)

### Special options for modulating versions BA9

- 0** >1,5Vdc 'ON' ; <1Vdc 'OFF' (100kOhm)
- 1** >6Vdc 'ON' ; <5,5Vdc 'OFF' (100kOhm)

### Design type

- 6** 1Watt version, fixed cable
- 7** 1Watt version, cable with connector

### Valve adapter

- 00** delivery without valve adapter (*to be ordered separately*)
- 50** delivery with valve adapter, type VA50
- 80** delivery with valve adapter, type VA80

### Cable length (L) for electrical wiring

- 00** without cable (*to be ordered separately, L: 1, 2, 5, 10, 15, 20m*)
- 01** with cable, L: 1m
- 02** with cable, L: 2m

### Special versions

- *no specific customization*
- N** neutral version (*no logo*)
- HC** version with cable free of halogen
- ... etc.

### 'Stroke Adapt' function

Thanks to the stroke adapt function the travel of the actuator is automatically 100% adapted to the stroke of the control valve.

# New generation of thermic actuators

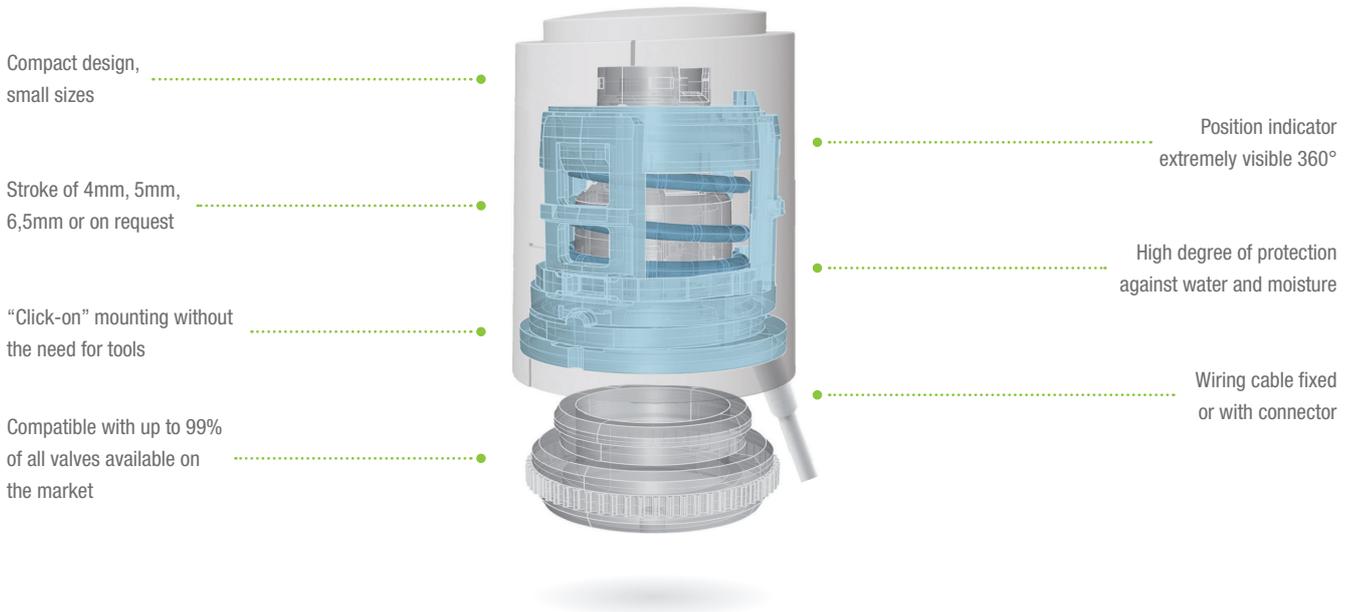

The latest generation of thermic actuators benefits from many innovations which make these actuators even more suited for the most diverse requirements in terminal control applications.

The scope of application is now enlarged because of the greater stroke these actuators offer. On top of that different other design innovations offer numerous opportunities for energy and cost savings.

In particular, in the field of energy consumption a new milestone is put into the market. Thanks to modern technology, the power consumption can be reduced by 50%! The latest series of thermic actuators BA6/BA7 therefore consumes only 1W in operation.

## Basic characteristics of the thermic actuators

## More efficient, more compact, more features

Small in size, but big in performance: energy-efficient with only 1 Watt of energy consumption. With a production volume of over 2 million units a year this saves a total of approx. 2 megawatts! The BA6/BA7 series offers even more. In the new range you'll find the right actuator to fit every valve for every application. Compared to the previous generation the new series has been designed to be even more compact (3.5mm less installation height), while at the same time ensuring 100% backwards compatibility.

## Actuators modulating

BA6/BA7

- Normally closed version NC (or NO)
- With or without 'First-Open' function
- Flexible adaption of connecting cable
- $U_v$ : AC 24 Volt, 50/60Hz
- Control signal Y: 0(2)..10Vdc
- Unique valve adapter concept (order separately)

The assembly in the selection table above includes the delivery of the terminal control valve with its thermic actuator, the valve adapter (VA80) and the connecting cable for electric wiring (cable length 1m).

Extra cost for each extra meter of cable: 1,-€/m (page 10).

Ordering examples	Description
NG2P15A.BA4007	2-port terminal control valve DN15 (1/2") Kvs 1,6 adjustable, with thermic actuator (1Watt) AC 24 Volt On/Off, including 1m cable and valve adapter VA80
NG2P15A.BA4007.02	2-port terminal control valve DN15 (1/2") Kvs 1,6 adjustable, with thermic actuator (1Watt) AC 24 Volt On/Off, including 2m cable and valve adapter VA80

Datasheet

## 3-port terminal control valves • PN10 • flat connections with connection part • diverting

- 3-port terminal control valve bronze
- PN10 • DN15..DN25 (diverting)
- Medium: water +2..+100°C (VDI 2035)
- Kvs: fixed
- Flat connections with connection part ISO7/1
- With NC actuator port I-II normally closed <sup>1)</sup>

<sup>1)</sup> removable cable (with connector)

<sup>2)</sup> on request

▲ standard

The assembly in the selection table above includes the delivery of the terminal control valve with its thermic actuator, the valve adapter (VA80) and the connecting cable for electric wiring (cable length 1m).

Extra cost for each extra meter of cable: 1,-€/m (page 10).

Ordering examples	Description
NCQM2D15A.BA4007	2-port PICV terminal control valve NCQM DN15 (½"), flow range 150..1050l/h, with thermic actuator (1Watt) AC 24 Volt On/Off, including 1m cable and valve adapter VA80
NCQM2D15A.BA4007.02	2-port PICV terminal control valve NCQM DN15 (½"), flow range 150..1050l/h, with thermic actuator (1Watt) AC 24 Volt On/Off, including 2m cable and valve adapter VA80

Note:

1. the actuator stroke is the full stroke without taking into account the (typical) 0.5mm loss due to the valve adapter mounting
2. all actuator types mentioned above are without valve adapter (to be ordered separately)

FO: with first open function    FC: fixed cable    CON: cable with connector
