**BinMaster[®] Awarded Best Sales Performance of 2010
for 3DLevelScanner by APM-Solutions**

(Lincoln, Nebraska—May 25, 2011) BinMaster[®] Level Controls has been awarded the 2010 Best Sales Performance of the Year award for the 3DLevelScanner by APM Automation Solutions. BinMaster is the first and only private label distributor of the 3DLevelScanner in the United States and Canada, with its dedicated sales and technical staff having installed hundreds of the advanced systems in the last two years. The 3DLevelScanner is a non-contact, dust-penetrating sensor that takes multiple measurements in the bin to provide highly accurate level and volume measurement data. Its accompanying software features a unique 3D visualization tool to help detect cone up or down, sidewall buildup or bridging in a bin.

“BinMaster is dedicated to providing the best technology to address complex bin level challenges and the 3DLevelScanner is ideal for customers who demand increased accuracy and reliable volume estimates,” stated Todd Peterson, BinMaster’s vice president of sales. “BinMaster has built a diverse 3DLevelScanner installation base in the United States and Canada in industries including ethanol, grain, cement, aggregates, fertilizer, milling, food manufacturing, plastics, power and mining. Customer interest continues to grow with recent advancements in 3DLevelScanner technology such as the MVL multi-scanner system for very large bins and the 3D MultiVision™ software that enables viewing data for multiple tanks, by multiple users, for multiple locations simultaneously.”

About BinMaster

BinMaster is a division of Garner Industries – an ISO 9001:2008 certified company established in 1953 and headquartered in a 75,000 square foot manufacturing facility in Lincoln, Nebraska, USA. BinMaster is strategically focused on designing, manufacturing and marketing reliable, proven sensing devices for the measurement of bulk solid and liquid materials for the feed and grain, food, plastics, pulp & paper, power, mining, and concrete industries. The BinMaster product line is sold worldwide and features many diverse technologies for bin level indication and measurement, being well known for its SmartBob2 and 3DLevelScanner advanced inventory management solutions.
