**Garner Industries Receives ISO 9001:2008 Certification**  
*BinMaster Subsidiary Committed to Quality*

(Lincoln, Nebraska—August 20, 2010) Garner Industries, parent company and manufacturer of the BinMaster brand of level controls in Lincoln, Nebraska, has received ISO 9001:2008 certification of its quality management system. First certified to ISO 9001:2000 in 2005, this updated quality certification confirms the company's dedication to providing the highest level of customer satisfaction by adhering to processes supported by a quality management system which complies with the most recent global quality standards.

Established in 1953, Garner Industries is home to the BinMaster level controls line of products which are manufactured at the company's 78,000 square foot facility in Lincoln, Nebraska. BinMaster markets equipment for measuring the level of contents in bins, silos and hoppers. The product line includes the 3DLevelScanner, SmartBob cable-based sensors and eBob inventory management software, rotaries, capacitance probes, vibrating rods, ultrasonic, radar, pressure and tilt switches. In receiving this updated registration, Garner and its BinMaster brand demonstrate a continuing commitment to high standards in its approach to developing, implementing and the ongoing improvement of its quality management processes.

"BinMaster is committed to meeting the requirements of our customers, and we know that quality standards compliance is not only a customer expectation, but a necessity for gaining the trust and business of our customers," commented Scott McLain, president of Garner Industries. "We are pleased to receive this latest ISO quality registration that underscores our quality track record and the consistently high level of our quality management procedures."

**About BinMaster**

BinMaster is a division of Garner Industries – an ISO 9001:2008 certified company established in 1953 and headquartered in a 75,000 square-foot manufacturing facility in Lincoln, Nebraska, USA. BinMaster is strategically focused on designing, manufacturing and marketing reliable, proven sensing devices for the measurement of bulk solid and liquid materials for the feed and grain, food, plastics, pulp & paper, power, mining, and concrete industries. The BinMaster product line is sold worldwide and features many diverse technologies for bin level indication and measurement, being well known for its SmartBob2 advanced inventory management solution.
