**BinMaster<sup>®</sup> Appoints Cape Instruments as Distributor  
for SmartBob and Point Level Controls in South Africa**

(Lincoln, Nebraska—August 21, 2009) BinMaster<sup>®</sup> Level Controls of Lincoln, Nebraska, USA has appointed Cape Instrument Services CC of Cape Town, South Africa as distributor for the company's SmartBob continuous level management system and point level controls throughout the country of South Africa. Cape Instruments will sell, install and service the BinMaster SmartBob cable-based inventory management system plus its rotary level indicators, capacitance probes, vibrating rods, diaphragm switches, and flow and dust detection products.

“South Africa has excellent market potential with its growing infrastructure and diverse economy,” said Todd Peterson, BinMaster's vice president of sales. “The country has demonstrated a need for BinMaster's SmartBob inventory management solution in a variety of industries including agriculture, food processing, cement, mining and various manufacturing facilities. Cape Instruments will be able to provide local consultation to help customers identify the right products for their level measurement application.”

Joseph Goldenbaum, sales director for Cape Instruments commented, “BinMaster is an outstanding brand that has been in existence for more than 40 years. Combining BinMaster's quality products with Cape Instruments knowledge of the South African market enables the two companies to solve customers' powder and bulk solids measurement challenges by offering a variety of solutions for all types of bins and materials.”

**About BinMaster**

BinMaster is a division of Garner Industries – an ISO 9001:2000 certified company established in 1953 and headquartered in a 75,000 square foot manufacturing facility in Lincoln, Nebraska, USA. BinMaster is strategically focused on designing, manufacturing and marketing reliable, proven sensing devices for the measurement of bulk solid and liquid materials for the feed and grain, food, plastics, pulp & paper, power, mining, and concrete industries. The BinMaster product line is sold worldwide and features many diverse technologies for bin level indication and measurement, being well known for its SmartBob2 advanced inventory management solution.
