## **BLT 16-3000 Thinners**

### **Description**

**BLT 16-3000 Thinner** is a high purity solvent for maintaining the Specific Gravity of Isopropyl Alcohol based wave soldering fluxes.

**BLT 16-3000 Thinner** is suitable for all IPA based products operations in the Specific Gravity Range of 0.80-0.950.

The addition of thinner is required to replace the solvent content lost by evaporation during foam fluxing.

### **Application**

Follow the instructions in the flux data sheet to maintain the flux SG at the original value. Do not exceed the recommended number of thinner additions. BLT 16-3000 Thinner can also be used as a cleaning solvent to remove flux residues from printed circuit boards and process equipment.

### **Handling Precautions**

**BLT 16-3000 Thinner** is 100% solvent based and is highly flammable. Avoid contact with the skin and eyes. Use only in a well-ventilated area and refer to the separate Health & Safety Data Sheet.
