

Congress and voting systems for The Supreme Court of Russian Federation.

BOSCH

Invented for life

Industry:
Government

Information:

The Supreme Court of the Russian Federation is the immediate superior judicial instance in relation to the supreme courts of republics, province (region) courts, and federal status city courts, courts of the autonomous regions and autonomous circuits, military courts of military circuits, fleets, types and groups of troops.

Business Objective:

Installation of wireless congress systems in order to conduct high-level meeting and negotiations without voting was needed. The necessity to install congress equipment appears due to lack of required congress solutions in the Supreme Court.

Solution:

Having discussed all details with End-User, Bosch had offered the installation of the conference and voting systems. Installed equipment allowed arranging the high-level meetings. The Bosch equipment was installed in the Marble conference Hall on the Supreme Court. Perfect design, new technologies to decrease power consumption and ability to of ease and quick battery change as well as low susceptibility to electromagnetic interference distinguished Bosch offer among competitors.

Congress:

DCN Next Generation - 30 pcs
Wireless delegated unit DCN-WD-D - 30 pcs
Pluggable microphone DCN-MICL - 30 pcs
DCN-WAP - 1 pcs
DCN-WCC - 1 pcs

Result:

Usage of brand new equipment and state-of-art technologies provides full compliance to strict worldwide standards of quality and security. Installed Bosch equipment provides high-level meetings. Congress and voting systems are working both with the help of operator and automatically. Participants of meetings have confirmed that the new technologies intrusion into daily work of the Supreme Court sufficiently increased efficiency as well as enhance the general work of government body.
