

EXPOFORUM Convention and Exhibition Centre is St. Petersburg's newest and most modern venue for business, culture and entertainment

EXPOFORUM St. Petersburg

Objectives

Installation of a modern multi-zone public address system that:

- allows guests of the Convention and Exhibition Centre to be immediately informed on upcoming events
- sends speech announcements for staff to service rooms
- provides background music in restaurants and other areas

Highlights

- More than eight Praesideo network controllers connected into one network with audio and control data transmission over TCP/IP and more than 86 power amplifiers
- Around 2500 loudspeakers in exhibition halls, the congress center, and in outdoor areas
- More than 1400 supervision control boards located in the Praesideo power amplifiers and in the loudspeakers

Customer benefits

- Effective operational management of sound broadcasting and a system for flexible expansion in the future
