

Providing sound and safety for Sohotel, Panchshil Group – Pune, India

BOSCH

Invented for life

Industry:

Hotel

End User:

Panchshil Group

Panchshil Realty is Pune's premier real estate developer having commenced its operations in 1996. The company has successfully delivered over 10 million square feet of prime real estate over the last decade and is currently developing another 23 million square feet for residential, commercial and hospitality purposes.

Their integrated approach to serving clients spans across planning, construction, architectural and design services and also permeates to developing infrastructure around their properties, providing automation and facility management services.

Business Objective:

With Sohotel being a 5-Star flagship property of the Panchshil Realty Group, Panchshil wanted a state-of-the-art professional sound solution for their public areas & restaurants. Also, as one of the life safety measures for their guests, they required a high quality fire alarm system.

The end-user was looking for products that would meet his statutory & business requirements, including being user-friendly, functionally effective, and aesthetically pleasing.

After evaluation, Bosch was zeroed in on for its technical advantage and cost benefit ratio.

Solution:

The end-users were bowled over by the high quality products and technology offered by Bosch, especially the invisible detectors. The Bosch products accurately captured the customers' requirements and offered the right and effective solution.

Bosch Communications Systems including loudspeakers and amplifiers from Electro-Voice (EV) – ZX1i, ELX118, EVU 1062/95, SB122 & SB122PI, S-40B, Q Series Amplifiers, DC One, and PA Series Amplifiers – were installed in the lounge area, coffee shops, and gymnasium. The purpose was to provide soothing music for relaxation of the guests.

Bosch Fire Alarm Systems - FPA-5000 series panel, FAP O 520, FAP O 420, and sturdy Conventional manual call points – were installed hotel wide to provide maximum protection for all guests in case of a fire emergency.

The good quality sound from EV speakers as well as reliability of the fire alarm systems proved to be the perfect solution that met the end-user demands.

Sohotel

Customer Benefit:

Not only were the products easy to install, Bosch also provided training to Customer's Operation & Maintenance personnel for better handling and maintenance of the systems.

EV speakers' exceptional sound clarity has delivered the kind of impact the end-user wanted for the Lounge Bars and other areas. On the other hand, the invisible detectors have augmented the overall lobby architecture and aesthetics.

Key Success Factors:

- System fit to requirements of end-user
- High-quality sound system and fire alarms system
- Training support from Bosch

'We are confident of the Bosch product quality and standards. Looking at the deliverables of Bosch products, we are rest assured that we have taken the right call.'
