

China Minsheng Bank

Challenges/ objectives

- Deliver a comprehensive and integrated security system for the headquarters of China Minsheng Bank
- Consisting of five towers on a 200 acre campus, each of the towers represents an independent building. China Minsheng Bank required an integrated security solution for the entire headquarters

Solution

- Bosch Building Integration System (BIS) is used to connect more than a hundred access control systems, intrusion detection systems and some 1,500 video cameras and also to integrate voice evacuation, public address and conferencing systems

Customer benefits

- Centralize the security aspects in Minsheng's headquarters
- Greatly increase both security levels and operational efficiency
