Union Square, Warsaw

Objectives

- Deliver a complete and integrated security solution for a floor area of more than 100.000 square meters. The Union Square contains a shopping center, offices and a large parking garage

Highlights

- Fire detection access control, video surveillance, voice evacuation systems networked and integrated through the IP protocol and Building Integration System (BIS).
- Fire alarm system with eight networked fire panels, supporting more than 14.000 fire detectors, controls and external devices.
- CCTV network consists of 195 cameras including Full HD cameras

Customer benefits

- The entire solution was designed as an integrated security system to combine the highest security level with great efficiency both in operations and cost.
