

# Le Méridien She Shan trusts Bosch

**BOSCH**

Invented for life

## Industry:

Hotel

## End User:

### Le Méridien She Shan, Shanghai Hotel

Situated approximately 46 kilometers outside of Shanghai, Le Méridien She Shan is one of the largest and most luxurious hotels in China. Located in the National Tourist Resort of She Shan, the hotel boasts fantastic scenic views of Yuehu Lake and a spectacular mountain range. Designed to blend in with the surroundings, the hotel's comprehensive facilities include 327 spacious guest rooms and suites, a grand ballroom covering more than 19,000 sq ft, a 470-seat auditorium, seven meeting rooms and a 500 sqm spa and fitness club.

## Business Objective:

The challenge for Le Méridien She Shan was to provide adequate indoor and outdoor video surveillance of the vast landscape, without invading the privacy of the hotel's prestigious guests. In addition, the wide open areas and lack of boundary lines separating the natural landscape was part of the hotel's charm and needed to be maintained. The appearance of cameras had to be kept to a minimum and had to be designed to harmonize with the style of architecture and surrounding area.

## Solution:

Much care was taken to ensure that there was sufficient video surveillance for outdoor coverage without compromising the breathtaking view. Bosch worked with the hotel's security team from the early stage of pre-design and throughout the various stages of construction to achieve maximum satisfaction for the customer.

In all, more than 300 Bosch cameras, including FlexiDomes and AutoDomes, were installed in the hotel and garden.

The LTC 8800 Bosch Allegiant system, with its 300 cameras, secured both indoor and outdoor facilities. The AutoDome maintains peak performance, making it the ideal solution for perimeter surveillance. The day and night cameras provide extra sensitivity under changing light conditions, while high-resolution cameras capture the finest detail. Tough, weatherproof housing was also provided for the outdoor cameras.

Le Méridien She Shan, Shanghai Hotel

The AutoDome system was coupled with the Allegiant matrix system, which offers full matrix switch capability and displays the video from any camera on any monitor. The system has a proven record of reliability and performance, satisfying the hotel's requirement for video recording and monitoring solution.

## Result:

The solution provided a user friendly, easy-to-install and low-maintenance system for Le Méridien She Shan Shanghai Hotel. Fulfilling the top objective of effective surveillance with minimal impact on the environment, guests at the hotel can safely relax and soak in the beautiful surroundings.

"The Bosch AutoDome camera system was installed in 2005. We are pleased with the modular camera system, which delivers exceptional image clarity control and sensitivity. We trust that the proven reliability of Bosch systems will guarantee the daily security of all our guests." said Mr. Wang, Assistant Manager of the Engineering Department, Le Méridien She Shan.
