Domestic & International Terminal, Antalya

Objectives

➔ Make calls to different zones at the same time using esthetically looking equipment

➔ Automatic increase of the volume of sound system as soon as the building gets crowded (Automatic volume control)

➔ Public Address and Emergency Sound System which communicates with the fire alarm system in order to guarantee highest safety

Highlights

➔ 3500 automatic fire detectors (heat, optical), 40 beam detectors

➔ 6 FPA 5000 modular fire panels, 2 FMR 5000 remote keypads

➔ Building Integration System (BIS) with 6800 points & 4 users

➔ Praesideo Digital Public Address and Emergency Sound System

➔ 1700 ceiling loudspeakers, 130 horn loudspeakers

➔ 300 sound projectors, 2 network controller, 48 power amplifiers

➔ 25 call stations

Customer benefits

➔ Flexible system for future expansions and easy 3rd party integration

➔ Thanks to Praesideo's open interface, Flight Information System (FIS) was easily integrated to the P.A. system
