Congress Rental

# 2014 G20 Leaders Summit

## Objectives

- Easy communication across 14 languages
- Reliable and secure wireless coverage throughout conference venue
- Encryption for security over communications

## Highlights

- Discussion Units feature 128-bits AES encryption to ensure information remains confidential
- Seamless integration of dome cameras with the DCN discussion units, allowing the cameras to automatically capture the person speaking at the ‘live’ microphone and project them onto surrounding screens.
- Integrus Radiator system was essential in providing 16 channels for the DCN-WD-D Wireless Discussion Units
- The Infra-red Receivers are used for language distribution within the meetings and ensured all delegates received signals without disturbance

## Customer benefits

- Integrus systems were used to ensure the venue was covered with powerful and uniform IR-radiation for secure and seamless wireless communication
- Wireless conference discussion units and 32-channel infra-red receivers were used at the Parliament house to maintain a neat meeting environment
- On-the-spot interpretation → increased efficiency and flow
