

Protect your hoses – and your bottom line.

Caplugs hose guards (SHG Series) are designed to shield hydraulic, pneumatic and high-pressure hoses from crushing, cuts, abrasions and degradation caused by rocks, stones, tree branches and even sunlight.

Our hose guards offer economical protection that will increase the life of your hoses and help preserve expensive equipment.

- Highly flexible for full range of movement
- Durable for impact resistance
- Double bevel design cushions the hose

SHG Series specifics:

- Available in six sizes to fit hoses from 3/4" to 6" in diameter
- Manufactured of durable high-density polyethylene
- Sold in coils – can be cut to any length
- Variety of colors – match equipment or color code connections

Solutions for all your hydraulic protection needs

Why you need our protection:

- Protect delicate threads during shipment and storage
- Keep ports free from contamination
- Use for low-pressure testing
- Mask off areas during finishing processes
- Increase life of your hoses

Types of fittings/applications we protect:

- SAE
- NPT
- JIC
- Metric
- British standard pipe
- Flared/flareless
- Flanges
- Cartridge valves
- Pipe ends
- Hundreds more

Leader in Product Protection

Caplugs has been a leader in plastic molding since 1948. Today Caplugs has more than 9,000 standard catalog parts with over 400 million in stock and ready to ship.

Global Supplier

Caplugs has four comprehensive manufacturing facilities in New York, Pennsylvania, California and Shanghai, China. Caplugs China is a local source you can trust with full in-house engineering, molding and customer service right in the heart of Shanghai. Caplugs also has local sales representatives in Canada, Mexico, Europe, Israel and Japan.

Fitting Protection

Seal out contaminants and protect delicate threads with Caplugs' full line of plastic caps and plugs. Available in threaded, non-threaded, straight wall, tapered, tear-tab, pull-tab and more.

Hose Protection

Caplugs' line of hose guard and hose bend restrictors ensures hydraulic, pneumatic and high-pressure hoses are protected while operating in harsh environments. Use inexpensive hose protection now to save yourself time and money later.

Masking

Choose from a range of masking devices including caps, plugs, tapes or discs. Caplugs' masking products are available in a variety of materials, from silicone and Flex500[®] for high-temperature finishing processes to polyethylene and standard vinyl for lower temperature finishing or painting.

Pipe Caps and Flange Covers

From 1/2" to 64" in diameter, Caplugs' pipe caps and flange covers are designed to protect delicate pipe threads and flange surfaces during shipment and storage. These inexpensive parts are designed for ease of use, ensuring quick installation and removal.

Custom

Caplugs' team of design engineers will work with you one-on-one from part conception and prototyping to production and packaging. Our range of processes and materials allows us to offer you a variety of solutions and provide you with the part you need at the price you want.
