### **New Large Self-Clinch Studs for Heavy Duty Use**

Captive offers CH Series large, flush-head, self-clinching studs for rugged applications. They are available in 3/8-16 inch and M10 metric thread sizes, in carbon steel and stainless steel material.

The studs are ideal where extra strength and durability is required regarding pushout and torque-out performance. They provide a strong, permanently attached flush head assembly in materials as thin as .093 in. (2.4 mm).

The studs are simply pressed into a round hole with a standard shop press or high speed installation equipment.

**Captive** manufactures a wide range of self-clinching fasteners and has a world-wide sales and distribution network.
