NEW CARTER ELECTRONIC TENSION GAUGE (ETG™) TAKES THE MYSTERY OUT OF BLADE TENSION

International Woodworking Fair, Atlanta, GA

August 25, 2004

During IWF 2004, Carter Products will unveil their latest band saw innovation. Aimed squarely at the 14" band saw market, the new Electronic Tension Gauge (ETG™) takes the guesswork out of blade tensioning once and for all.

This unique device helps maintain optimum blade tension at all times for best cutting accuracy and consistent performance. Easily set exactly the right tension for any size blade. Proper tension means better cutting and longer life of blades and machine components.

- *For 14" Jet, Delta and similar band saws*
- *Provides continuous, highly visible electronic readout*
- *Provides full blade tension information, even when saw is cutting*
- *Special safety circuit cuts power to saw when blade loses tension*
- *Simple installation*

To see a demonstration of the Carter ETG™ visit Carter Products in Hall B, Booth #5500 at the International Woodworking Fair.

Carter Products has been a leading supplier of productivity-enhancing products since 1929. Their line of band saw accessories is the broadest in the industry, including guides and tires for nearly every model of band saw on the market, past and present. Carter also offers a full range of guide line, laser positioning and inspection lighting, the innovative Carter Flip-Pod® vacuum part holddown system for CNC manufacturing, precision calibration instruments for widebelt sanding applications, and many other products.
