CARTER PRODUCTS ADDS SHOPSMITH TO BANDSAW GUIDES ROSTER

Grand Rapids MI • One of the most versatile pieces of shop equipment available today can now be upgraded with the industry-standard Carter Products bandsaw guide.

Shopsmith, Inc. manufactures the Mark V five-in-one workcenter. One of the featured capabilities of the Mark V is its bandsaw capabilities. Carter Products is pleased to add a guide upgrade kit for this popular and capable shop tool.

Guides are the key factor in better bandsaw performance. With a Carter Guide Conversion Kit installed, blade friction is greatly reduced due to the roller bearings that contact the side of the blade. The blade runs cooler, resulting in greater accuracy, smoother cuts and longer blade life. Because there is no wear on the contact surfaces, Carter Guides do not require constant adjustment as with block guides. With the thrust support bearing at the rear of the guide, all surfaces remain virtually friction-free. Carter kits include all mounting hardware and full installation instructions.

Carter Guides adjust forward, backward and side-to-side for maximum flexibility, accommodating blades from 3/16" to 1" wide. The kit for Shopsmith tools is available at fine woodworking supplies distributors and online at www.carterproducts.com. M.S.R.P. is \$99.00.

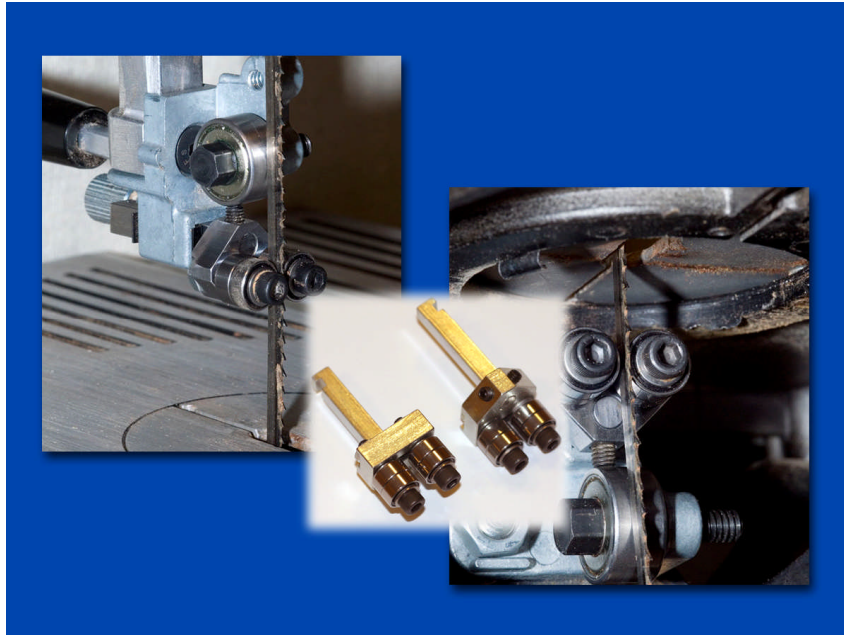

Carter Products has been a leading supplier of productivity-enhancing products since 1929. Their line of band saw accessories is the broadest in the industry, including guides and tires for nearly every model of bandsaw on the market, past and present. Carter also offers a full range of guide line, laser positioning and inspection lighting, the innovative Carter Flip-Pod[®] vacuum part holddown system for CNC manufacturing, precision calibration instruments for widebelt sanding applications, and many other products.
