## CARTER PRODUCTS OFFERS FREE LASER DEMO VIDEO

**Grand Rapids MI** • The best way to understand the value of the CPS Precision Laser System from Carter Products is to see it in action. Now you can, with just a quick call.

The CPS is a two-dimensional projection system used extensively in woodworking, modular home and recreational vehicle manufacturing, stone, concrete and aerospace. The CPS System projects precise patterns of brilliant laser light directly onto a worksurface, allowing quick and accurate positioning of parts and fixtures for machining and assembly.

The CPS uses file data from AutoCAD or any CAD/CAM system used for creating layout or production drawings.

If you are estimating placements, or using time-consuming tape measurements to position work; you're increasing your set-up time, wasting production labor, increasing machine downtime, generating excessive scrap, and risking tool or fixture damage. Every one of these factors increases your costs.

To get your free video, on VHS or DVD, simply call 888-622-7837 and ask for Kip Walworth. You can also send an e-mail to [walworth@carterproducts.com](mailto:walworth@carterproducts.com). Please include your business name and contact phone number in your request.

Carter Products has been a leading supplier of productivity-enhancing products since 1929. Carter offers a full range of guide line, laser positioning and inspection lighting, the innovative Carter Flip-Pod<sup>®</sup> vacuum part holddown system for CNC manufacturing, precision calibration instruments for widebelt sanding applications, and many other products. Their line of band saw accessories is the broadest in the industry, including guides and tires for nearly every model of bandsaw on the market, past and present.
