NEW ACCURIGHT® RATCHET-ROD™ SIMPLIFIES BANDSAW TENSIONING

Grand Rapids MI • Carter Products is pleased to introduce the AccuRight Ratchet-Rod Quick Tune bandsaw tension rod assembly for 14" bandsaws. This is the latest innovation in Carter's industry-leading roster of bandsaw enhancement products.

The Ratchet-Rod (patent pending) from Carter allows users to quickly change blade tension with simple turn of the large adjustment knob. The ratchet-style handle is readily changed from forward to reverse operation. This allows virtually unlimited control of the blade tension. Optimum tension can be achieved with less effort than with other assemblies on the market today.

The Ratchet Rod utilizes a high-quality Acme-threaded™ rod for superior durability, accuracy, and ease of rotation. The Ratchet-Rod can also be adjusted with any 3/8" drive socket wrench by simply removing the ratchet handle. This feature allows use of a torque wrench to determine approximate blade tension.

Carter Products has been a leading supplier of productivity-enhancing products since 1929. Their line of bandsaw accessories is the broadest in the industry, including guides and tires for nearly every model of bandsaw on the market, past and present. Carter also offers a full range of guide line, laser positioning and inspection lighting, the innovative Carter Flip-Pod® vacuum part hold-down system for CNC manufacturing, precision calibration instruments for widebelt sanding applications, and many other products.
