## Universal Rack-Mount Bracket (BKT-ALL-R23)

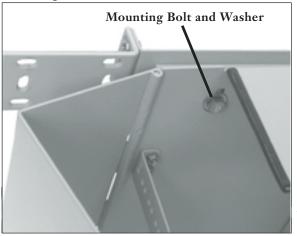

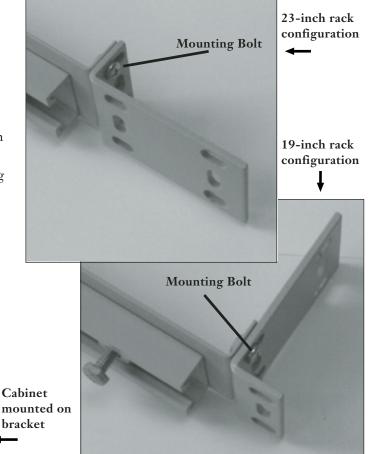

The Universal Rack-Mount Bracket is used to mount wall-mountable cabinets to 19- or 23-inch equipment racks.

Attach the bracket ends to the backplate for 19- or 23-inch rack as shown in the photos.

By sliding the mounting studs along this rail they can be aligned to mounting holes in the rear of the cabinet. The cabinet is attached to the bracket with bolts and washers provided.

Some vertical adjustment can be made by loosening the backplate/channel hardware and shifting the channel up or down. Tighten the hardware before installing the cabinet.
