

Press Release

Aug 1, 2006

New distributor in Spain

Circuit Design Inc., a company that develops and markets industrial use radio modules, has appointed the Affinity Group as its distributor in Spain. The Affinity Group has sales offices in Spain's main cities, selling electronic components and providing technical support. Their website is at www.affinityelectronics.com

The Affinity Group already handles the entire lineup of standard radio modules sold by Circuit Design, Inc. in Europe, and is now entering the Spanish market.

With the cooperation of the Affinity Group, Circuit Design, Inc. will expand our marketing of radio modules for the industrial sector in Spain.

New distributor in Australia

Circuit Design Inc., a company that develops and markets industrial use radio modules, has appointed Telelink Communications as its distributor in Australia. Telelink Communications has a track record covering over 20 years in the radio industry, and the company has a very high level of specialization. Their website is at <http://www.telelink.com.au/>

Telelink Communications has its headquarters in North Rockhampton, Queensland, providing radio products and associated engineering services.

Beyond the sale of Circuit Design products in the Australian market, Circuit Design, Inc. and Telelink Communications plan extensive cooperation, including the development of product applications.

Concluding the distributorship agreement
(March 2006)
(Left, Kazuo Maruyama, President, Circuit Design, Inc. and right, Mr. Jack Chomley, President, Telelink Communications)
