

SPILL CONTAINMENT SYSTEMS AND SAFETY PRODUCTS

C&D Technologies provides Spill Containment Systems for batteries and standby racks to meet current code requirements. These Spill Containment Systems are designed to protect employees and the environment by containing and neutralizing electrolyte in the event of an electrolyte spill.

COMPLIANCE

C&D provided Spill Containment Systems comply with applicable standards and laws set forth by the governing agencies. Systems are UL listed.

SPECIFICATIONS

- Barriers are 4 in (102 mm) high and are safety yellow for easy visibility
- Systems are designed for ease of installation by the minimal number of components
- Barrier sections bolt together with included hardware
- Floor mounting anchors are included with appropriate concrete drill bit
- Sealant and applicator gun are provided for barrier-barrier and barrier-floor seams
- Absorbing/neutralizing pillows are included and FR rated

SAFETY PRODUCTS

C&D can also provide battery room safety products to meet your requirements

- Spill cleanup kits
- Personal protection kits
- Goggles
- Face shields
- Gloves
- Eyewash Stations in various size
- Signs and sign kits
- Hydrogen detection monitors
- Aisle Mats
