

METALWORKING FLUID FOR NON-FERROUS METALS / EXOTIC ALLOYS

PRODUCT DESCRIPTION

NuSol® Alumax is a completely new technology that Chemtool Incorporated has introduced to the metalworking industry for the machining of non-ferrous metals and exotic alloys. NuSol® Alumax is formulated for all machining operations on all metals but is specifically designed to machine today's tougher non-ferrous and aluminum alloys. NuSol® Alumax is manufactured using a proprietary blending process that incorporates many unique characteristics into the product that will promote high productivity rates and minimal downtime for the end user.

NuSol® Alumax is formulated using a blend of unique preformed emulsions that possess a very small particle size and which demonstrate outstanding boundary lubrication. This small particle size provides a very durable and uniform lubricant film, enhanced wetting and coverage, a very clean running fluid, and exceptional hard water stability for enhanced machining performance on non-ferrous and aluminum alloys. NuSol® Alumax preformed emulsions are further complemented with the presence of a surfactant package, offering enhanced boundary lubrication and fluid detergency and cleanliness.

FEATURED BENEFITS

- Resistant to "Monday Morning Odors." The biostable chemistry maintains the pH eliminating objectionable odors
- Excellent corrosion protection for all tooling, equipment, and parts
- Exceptional lubricant film strength for increased tool life and finish on all metals
- Extremely small particle size for superior wetting and coverage on all metals
- Excellent hard water stability
- High degree of cleanliness and no reportable VOC's for operator acceptance.
- Halogen free
- Excellent rejection of process oils and system contaminants
- Low foaming
- Excellent tolerance and micro-finish control at Speed up to 10,000 RPM
- Higher viscosity oils offer improved boundary lubrication without heavy oil content reducing coolant carry-off and providing a cleaner machine interior
- High flash point oils eliminate mist and evaporation that reduces coolant cost and promotes a healthy work environment
- Proven history of being operator safe
- Tramp oil rejection eliminates a source for bacteria and rancid odors that reduces sump change outs, disposal costs, and machine downtime
