

Glass solar panels' introductions

1) Main features:

- a) The glass solar panels are widely used in solar roof systems, solar power stations, solar street lights, solar traffic lights, solar signal lights, solar lawn lights, solar garden lights, portable solar lanterns, solar fountains, solar security systems, portable solar chargers for vehicles' batteries(RV, Motor homes, Yachts, Houseboats, etc.), and other off-grid solar powered systems, etc.
- b) High-efficiency (over 18%) monocrystalline solar cells from Taiwan, polycrystalline is also available.
- c) 100% semi-finished & finished testing(Flash tester & EL tester) to ensure the performance of each solar panel.
- d) High light transmission glass, excellent mechanical loading performance.
- EVA, TPT, Frame, Junction box
- e) Words or Logos can be laminated in the panels(optional).
- h) Size or Voltage can be customized.
- j) Lifespan $\geq$ 25 years.

2) Structure of Glass solar panel

Remark:

- 1) Low-iron tempered glass, standard thickness is 3.2mm.
- 2) EVA, standard thickness is 0.5mm.
- 3) Solar Cells, standard thickness is 0.2mm.
- 4) TPT, standard thickness is 0.2mm.
- 5) Frame, anodized aluminium alloy.
