

MOON-Link Couplers

Transparent Duct Couplings

- Allows visual inspection of duct through the coupler
- Water-tight and airtight
- Simple installation
- Light-weight and low cost
- Provides excellent mechanical hold

MOON-Link duct couplings are constructed of a polyurethane elastomeric gasket within a durable, transparent outer shell. They are designed for coupling all types of conduit. The component parts are see-through, so the installer can verify that the conduit ends are fully seated within each half of the coupling.

Especially designed for coupling HDPE to PVC conduit, or even IPS steel, the MOON-Link coupling is easy to install, contains no metallic parts, and is completely watertight. The coupling provides a strong mechanical connection for a wide variety of conduit types.

Selection Guide

Description	Size	Duct OD		Part Number
		Inches	mm	
JM-CML-10TC132SP	1.00	1.315	33.40	956006-000
JM-CML-12TC167SP	1.25	1.660	42.16	419912-000
