## CommScope's PartnerPRO™ Network

Reliable global solutions delivered by certified local experts.

Exceptional solutions.  
Reliable service.  
Consistent quality.

## What you should expect when you work with the right people

Reliable network solutions don't come in boxes. They are delivered with the peace of mind that comes from years of network experience, technology expertise and insight inspired by extensive research, development and intelligence. They should provide the right technology at the right time with the right people to help you succeed.

Welcome to the CommScope  
PartnerPRO Network.

As a trusted network partner for wired and wireless communication networks around the world, CommScope is committed to providing you with the right solutions for today and tomorrow.

The PartnerPRO Network gives you access to the right people. The PartnerPRO Network consists of CommScope-certified local installers, consultants and integrators backed by the global experience of CommScope and trained to provide local insight that puts our high-performance solutions to work. Our objective is to help your network flourish and your business grow.

Andrew®

Since our partners work with superior CommScope solutions, you enjoy:

- The Andrew® 2-year, end-to-end RF Path warranty
- The 20-year SYSTIMAX® product and application warranty
- The 3-year SYSTIMAX® active component warranty

## PartnerPRO:

### Adding confidence to every solution

Our network of professionals exists to help propel your business forward. You benefit from the convenience of a diverse, well-trained and fully certified team of talented providers.

As an extension of our CommScope team, every partner shares our commitment to supporting your network. They also know CommScope solutions as well as we do, so you'll receive the same high level of global expertise with local insight to help simplify and accelerate network deployments.

### What the PartnerPRO Network means for you:

- State-of-the-art solutions that can keep you ahead of the technology curve
- Clear upgrade paths that can minimize CAPEX and OPEX
- More uptime and increased network reliability
- Global consistency of service and fast, certified installations
- CommScope warranty protection
- Greater network security, stability and efficiency for confident peace of mind

# PartnerPRO™ NETWORK

CommScope network solutions work best when they are designed, installed and configured by our highly-trained partners.

## **PartnerPRO:**

### **The highest standards deliver the highest value**

CommScope network solutions work best when they are designed, installed and configured by highly trained experts like our partners. They're uniquely qualified to get your network up faster, help it run more efficiently and minimize expensive downtime.

Like you, our partners see the value in our solutions—and they know how to deploy them with the same level of integrity and quality. When you choose the right people to deliver the right solutions, you get more than just performance, efficiency and reliability from your network. You also enjoy the peace of mind that comes from confidence in the expertise of the local provider and the caliber of the company that stands behind that expertise.

## PartnerPRO:

The right solution should be simple, complete and cost-effective

Growing network complexity and expenses are pushing many businesses to actively consolidate the number of vendors they use. To further complicate matters, many providers deliver solutions pieced together from various sources. This makes it difficult for you to see exactly how many vendors are really involved—and difficult to know who to trust when a problem arises.

Since CommScope is your single source for network infrastructure solutions, the PartnerPRO Network delivers the best of both worlds. This way, you aren't forced to choose between the simple solution and the complete solution—the right solution is one and the same.

Thousands of partners worldwide—and we're adding more every day.

Through CommScope's comprehensive training, certification and accreditation processes, thousands of partners are available to deliver the right CommScope solution—so you'll always know who built your infrastructure.

## PartnerPRO:

### An advantage you can rely on

Working with our certified experts means clear, concrete, practical benefits for your network at every stage. Our partners include:

- **CONSULTANTS** help ensure that every aspect of your network is designed, installed and integrated for excellent quality and performance. With extensive training and accreditation from CommScope, you can be confident that your network is built right from the start.
- **INTEGRATORS** evaluate your technology and recommend the best way to integrate world-class CommScope solutions into your network. Technology upgrades, overlays and investments are seamlessly integrated into your network—maintaining high performance with minimal disruption and downtime.
- **INSTALLERS** are local partners who understand the regional specifications that impact your network. Our rigorous training and certification program ensures that all of our installers are experts in global CommScope solutions. This allows them to integrate the best installation practices from global networks into your regional network—consistently and correctly.
- **DISTRIBUTORS** understand CommScope solutions inside and out. This extensive knowledge, paired with global distribution, means that you get the products you need, where and when you need them. This helps projects stay on schedule and on budget.
- **ALLIANCES** are trusted, well-known experts in specific areas of technology and expertise that enhance CommScope solutions. By partnering with well-known organizations like Redwood Systems®, Cisco, Axis® and HP, we can offer our customers some of the most advanced, innovative approaches to network design, installation and maintenance.

Members of the PartnerPRO Network are trained, certified and accredited to put the most important CommScope solutions to work for you. No other vendor can connect your business so quickly to CommScope's broad portfolio of leading-edge solutions.

- **Andrew Solutions™** reduce energy use, increase bandwidth and improve service for wireless cell sites
- **SYSTIMAX Solutions®** improve network infrastructure by increasing performance and efficiency for enterprises like intelligent buildings and data center networks
- **Uniprise Solutions®** connect your business with cost-effective structured cabling
- **In-building wireless solutions** provides exceptional coverage in demanding locations, including large stadiums, tall buildings, dense urban areas and—even deep underground
- **Broadband solutions** deliver connectivity to the home with exceptional value
- **Integration and consultation services** bend the technology curve to your advantage

### Premier and Select partners

CommScope offers two degrees of certification, depending on the partner's training, experience and knowledge of our solutions.

The right choice for your network challenge depends on your unique business priorities.

## PartnerPRO:

Global expertise. Local insight.

Staying ahead of the technology curve can be challenging, but it's necessary if you want to remain competitive and grow revenue opportunities. That's why it's smart to work with a solutions provider who removes the complexity from your network deployments. With the right consultants, integrators, installers, distributors and alliance partners, you can spend less time worrying about your technology challenges, and more time discovering ways to expand your business and improve your bottom line.

Our talented professionals give you the peace of mind to deliver your products and services with confidence. Expand the bandwidth of your business by utilizing the global expertise and local insight offered only by the PartnerPRO Network.
