

Duct Sealing Installation Tools

Installation Tools for Duct Sealing and Connecting Devices

A. Fiber Optic Simplex Plug Installation Tool

Designed to give the installer extra reach and facilitate the installation of fiber optic simplex plugs, this tool opens up to wrap around cable and is made to grip the plug's collar. The knurled surface of the tool provides traction for tightening.

B. Wrench Assemblies

These deep socket ratchet and brace and bit wrenches simplify installation of simplex and multi-holed plugs.

C. Deburring Tool

This tool is designed to debur and chamfer the outer and inner edges of duct ends to ease the installation of couplers and the passage of cable through duct couplings.

D. Strap Wrench

This popular reverse-threaded duct coupling installation tool does not scrape the surface of anodized duct couplings. It provides the extra torque needed to install several couplings in succession with minimum wrist fatigue.

E. Conduit Riser Adaptor

Adapts Sch80 risers to allow easy installation of simplex, triplex and quadplex plugs. Available with or without ventilation holes.
