

## Introducing a New Team Member

Once again, DATRON is G-R-O-W-I-N-G!

**Denise Coulombe** has been hired as Controller to manage all aspects of accounting and office administration. Denise is a CPA who earned a degree in Accountancy from Bently College in Waltham, MA. She has nearly 3 decades of experience for companies such as Medaglia & Co., Industrial Process Machinery, Consolidated Process Machinery and Ingersoll-Rand Company.

## New Features in DATRON Software v9.6

DATRON AG recently released Version 9.6 of their control software. Several of the new features in V 9.6 make this update extremely exciting and potentially “game changing” for DATRON users.

## Upcoming DATRON Dental Workshop Offered on East & West Coast:

If you’re wondering if it’s time to start milling your own titanium implants, plan to attend one of our upcoming dental CAD/CAM workshops. **“What It Takes to Mill Titanium Bars and Custom Abutments In-house”** will be held at DATRON Dynamics East on September 28th and at DATRON Dynamics West on October 5th. So, Attendees will learn exactly what is involved and just how profitable it can be. **There is no cost to attend, but space is limited.**

## Come see us at WESTEC, Oct. 15<sup>th</sup> - 17<sup>th</sup>

Curious about the latest advancements in high-speed machining? Come see us at WESTEC in **Booth #1325**. The manufacturing technology tradeshow will take place from October 15th – 17th at the Los Angeles Convention Center. [<Get a FREE Show Pass>](#)

## DATRON Opens West Coast Technology Center

A ribbon-cutting ceremony took place on July 10th for the new “Technology Center” opened by DATRON Dynamics at 6250 Preston Avenue in Livermore, CA. Similar to DATRON Dynamics’ East Coast Technology Center, the location near San Francisco showcases their popular machine models and allows the company to demonstrate the advanced capabilities of this equipment by milling “benchmark” parts for prospective customers. According to DATRON Dynamics’ West Coast Manager, Chris Hopkins, there were many reasons for opening this office. He explains, “We have a significant West Coast customer base and it is growing. Having a location in the same time zone and within driving distance allows us to support them in real time. It also enables us to provide West Coast manufacturers with applications consulting and show them how fast their parts can be made on a DATRON.”

## New Option: DATRON PerfectCut Surface-Smoothing Package for the M10 Pro, M8Cube and C5

This path-smoothing, symmetrical filter provides a significant improvement in surface quality and shortens cycle times when milling complex geometries. With PerfectCut your DATRON M10 Pro, M8Cube or C5 can achieve highest level of performance without the need for post-processing – thereby maximizing your productivity! Even programs with rough or discontinuous contours (due to CAM calculations) can be executed seamlessly. So, the machine runs quietly with less vibration and maximized feed rates.
