

Flexible Solutions Power Distribution System *Power-D-Box*[®]

Technical information

Power Distribution System *Power-D-Box*[®]

The E-T-A *Power-D-Box*[®] product group has been designed for power distribution systems featuring cost-effective and user-friendly termination technology, ease of maintenance and high availability.

A wealth of possible configurations makes the *Power-D-Box*[®] systems the ideal solution for nearly all applications in major industries.

E-T-A offers three basic versions:

- Economy *Power-D-Box*[®]
- Compact *Power-D-Box*[®]
- and High *Power-D-Box*[®]

Configurations available:

- modular version
- with sockets pre-wired
- with pcb-mounted sockets
- and customer-specific versions.

Economy *Power-D-Box*[®]

The Economy *Power-D-Box*[®] features a high degree of modularity. Industrialised standard products can be combined individually, tailored to customer's needs and cost-efficiently.

- height only 88 mm (2U)
- hot-swappable, temperature-insensitive circuit breaker types 8340/8335
- cost-effective design
- available as modular version or with pre-wired or pcb-mounted sockets

Compact *Power-D-Box*[®]

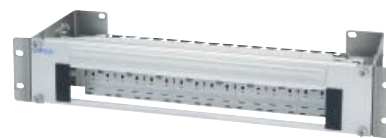

The Compact *Power-D-Box*[®] is the right choice for any application where height is a challenge. This version will always be tailored to customer's needs.

- maximum power distribution – minimum space requirement
- unrivalled functionality at a height of only 44 mm (1U)
- only available as a customised version

High *Power-D-Box*[®]

The High *Power-D-Box*[®] meets any requirement regarding current rating. It provides you with a versatile power distribution solution.

- single current 0.05 A - 125 A
- hot-swappable circuit breakers
- modular and pre-wired version available
