Change Description:

e2v is introducing and qualifying a new subcontractor for the deballing/reballing with leaded spheres in Sn/Pb content.

Identification Method to Distinguish Change:

None given this change does not affect the fit, form and functions of the part and the electrical characteristics remain unchanged. Reference P/Ns and marking are unaffected.

On request ,for future order and for a given product, e2v can inform its customers of traceability information regarding this new supplier

Qualification Data:

available

will be available in March 2015

not applicable

Samples: prototypes available

will be available in March 2015

not applicable

Quantifiable Impact on Quality & Reliability: *none*

Implementation Date*:

Customers are likely to receive products with deballing by this new supplier from March2015 onwards. However exact date is depending on overall customers' orders and coming inventory renewal

*The Estimated Implementation Date is the forecasted date that a customer may expect to receive changed product. This is determined by the estimated date of inventory depletion on the PCN issue date. This may be affected by fluctuations in supply and demand. Consequently, although customers should be prepared to receive changed product on this date, e2v semiconductors will continue to ship pre-changed product until a time in which inventory has been depleted. This may result in pre-changed product being shipped to customers after this forecasted date.
