

EAO extends Series 45: Double pushbuttons, toggle switches and accessories.

Olten, Switzerland, June 2016 – EAO, the expert partner for innovative, intuitive and reliable Human Machine Interfaces (HMIs), offers the new Series 45 that unites an extremely broad range of machine operating functions with outstanding technical characteristics. The Swiss-owned family company extends the innovative and modular Series 45 range with versatile, double pushbuttons, intuitive toggle switches and additional accessories.

The aesthetic and robust Series 45 double pushbuttons offer additional potential for applications with the second, separate button. They are a cost effective and space saving solution that provides two separate pushbuttons in a single device. Double pushbuttons are simple to mount and they are ideal for machinery control functions such as stop/start. Furthermore, the optional illuminated actuators and marking options offer numerous configurations to satisfy all industrial requirements.

Advantages of the double pushbuttons

- Compact construction – two switches in one device
- Range of colours and marking options
- IP69K protection
- Optional illumination
- Plastic or metal versions
- Up to 3 contacts for each pushbutton

The new Series 45 toggle switches offer the user intuitive operation and a clear visual indication of the switch position, which makes them universally suitable. Thanks to their robust construction (IP69K), these innovative products are ideal for harsh industrial environments. The two-position toggle switches offer impressive features such as a long service life and an excellent tactile feedback, whether a maintained or momentary switching action or fitted with plastic or metal front construction.

Advantages of the toggle switches

- Universal
- IP69K protection
- Ease of use
- Plastic or metal version
- Long service life
- Clear indication of switch position

Further enhancements of EAO to the range of Series 45 accessories now include metal and plastic enclosures, additional switching and illumination elements, as well as protection and marking options that all together optimally complete the Series 45.

About EAO:***Human Machine Interfaces. Since 1947.***

EAO AG, a Swiss, family-owned company founded in 1947, has developed into one of the world's leading manufacturers of high-quality switches, keyboards, sophisticated control elements, and complete HMI control units and HMI Systems. With over 600 dedicated employees, EAO has a global production and distribution network at its disposal. And with production sites in Switzerland, Germany, North America and China, as well as our 11 country sales companies and distributors in over 50 countries, we can guarantee global availability.

Your solution-focused expert and partner

EAO does much more than just manufacture individual control elements. As a solution-focused partner, we provide the option of technically and mechanically customising existing HMI Components in line with our customers' individual requirements. From simple control elements through to sophisticated HMI Systems, from serial production through to installation – we offer the entire range of HMI services and inspire the confidence of our customers.
