

Minneapolis, MN July 14, 2016—The new PBT Mini SWASH is the updated and improved replacement to the StencilClean SIA. The Mini SWASH brings both new innovations of the existing machine and new configurations, Mini SWASH III, for low volume PCBA cleaning. The new features include: zero drain system with high capacity of rinse, longer lifetime and usability of DI water filters, open or closed loop filtration, traceability with barcode reader for process logging and operator friendly frame fixturing.

EasyBraid Co. is the exclusive North American supplier of PBT Cleaning Systems, as well as PUREX Fume Extraction Systems, ALeader AOI, SEC X-ray Inspection, and is a leading manufacturer of soldering and desoldering devices.
