

EVALUATE ROCK SOLID SMART POWER LINE LIGHTING CONTROLS

- » Decorative street lighting
- » Underground parking garages
- » Tunnel lighting
- » Lighting in harsh environments

Explore the rewards of smart outdoor lighting control with this low-cost pilot program

You want systems that deliver reliable operation, predictive maintenance and actionable data reporting. Smart *Lumewave by Echelon*[®] power line controls do just that, and, with a suite of safety and comfort capabilities, ensure optimal performance. You'll have help reducing costs, along with your CO₂ footprint, without compromising security or energy efficiency. Ideal for applications from corporate or educational campuses to citywide deployments, these flexible and scalable solutions are built on a future-proof technology platform.

Bundling smart *Lumewave by Echelon* power line controls with an LED lighting upgrade achieves:

- Up to 70% energy savings with adaptive intelligent control
- Up to 80% carbon reductions toward climate goals
- Enhanced safety and security with options for emergency scene assist, illuminated direction of travel, and more
- Extended lifecycle of lighting infrastructure
- Reduced operating and maintenance costs
- Integrated lighting control and connectivity across your installation, regardless of fixture or lamp type
- Opportunities for integration with indoor lighting and other building systems
- Ability to implement smart city applications now and in the future

Join other campuses and cities in testing smart outdoor lighting!

Lumewave by Echelon Smart Outdoor Lighting Pilot Program

PL Pilot Kit Includes:

- 5 CPD3000 lighting controllers
- 1 SmartServer Power Line Segment Controller
- 1 cellular modem with SIM card
- 2 power line filters
- 90 days' cellular service (activated upon shipment)
- 90 days' license for LumInsight™ Cloud central management system (CMS) (activated upon shipment)

Options:

- Additional CPD3000 lighting controllers (up to 30 total)
- 3-phase power line coupler

Special Terms and Conditions:

- Special terms and conditions provided in participation agreement apply, including:
 - Pilot kit and any options will be invoiced on shipment. Pilot participants receive net 90 payment terms.
 - At the end of the pilot period, participant is responsible for payment of the outstanding invoice or return of any items under this program to Echelon. Participants wishing to continue with pilot installation must contact Echelon to transfer cellular service and assume financial responsibility for cellular service at that time.
