LUMEWAVE

By **ECHELON**®

Lumewave TN Starter Kit Welcome Note

PILOT IN A BOX

Overview

Congratulations on acquiring Echelon's Lumewave Starter Kit, a virtual 'Pilot program in a box' which will enable you to get started on a real world prototype of your Lighting control system.

The starter kit is the beginning – you will be able to monitor your energy and tune your system to maximize energy and cost savings.

Fixture Recommendations

The TN Starter Kit, (Threaded Nipple version,   Echelon orderable part # 101001) is designed for fixtures that do not have, or lack provisions for installing, a NEMA photocell connector. The TOP900TN mounts using a ½" threaded nipple providing flexible mounting options including on fixture, on pole-cap, and junction box mounting. A 0-10V dimming driver is recommended for maximum functionality and energy savings.

Box Contents

Inside you will find the following;

Quantity	Description	PN	Image
1ea	Lumewave Ethernet Gateway	100111	
1ea	LumeStar Software USB Drive		

5ea	TOP900TN (Gray)	100106
