

EIT Cable Manufacturing (ECM)

EIT® LLC provides Electronic Manufacturing & Engineering Services to medical, instrumentation, communication, industrial and defense markets. EIT operates multiple facilities that are easily accessible from the Carolinas throughout the Mid-Atlantic region and into New England. EIT is vertically integrated and our capabilities include cable & wire harness design, manufacturing and support through our EIT Cable Manufacturing (ECM) operations located at our Riverview Center in Danville. ECM builds, tests & ships cable and wire harness products direct to customers in addition to incorporating them into both electronic and high level assemblies built by EIT.

- ECM operations fall under EIT's Corporate Quality Management System and are registered to ISO 9001 & ISO 13485 (medical)
- Team members are trained to IPC-A-620 and EIT maintains ITAR registration at all facilities
- Cable & wire harness types produced by ECM include coaxial, D-Sub, hook-up wire, modular plug & patch, multi-conductor & circular and ribbon
- EIT tests to customer requirements including continuity and high pot
- EIT has the ability to hold UL & CSA files for customers
- Engineering resources are available to assist with design, documentation and generation of cable and wire harness assembly drawings

Assembly Services

EIT provides sub and top level electronic and mechanical assembly of products from our ECM operation.

Current/Recent products assembled include:

- Fan subassemblies requiring diodes, capacitors, and wire connectors attached
- Epoxy potting for harsh environment protection
- Wireless mesh network control box
- Wi-Fi communications modules
