

Press Release

Electronic Manufacturing & Engineering Services

Creative Design & Quality Production

STERLING, VIRGINIA NOVEMBER 10, 2011

EIT, LLC (www.eit.com) announces the opening of a second manufacturing facility in Danville, Virginia. The new 60,000 square foot facility at the Cyber Park in Danville is the second facility in Danville and fourth overall facility for EIT. The new facility increases EIT's total facility space to just under 200,000 square feet.

EIT's new facility will focus on manufacturing of printed circuit board assemblies (PCBA). The facility will also offer test, mechanical assembly and fulfillment services. The facility was designed to be flexible and features an open floor plan, ANSI/ESD S20.20 compliant flooring and climate & humidity control throughout the facility. EIT's manufacturing services are supported by an experienced engineering team that offers electronic, mechanical and design services.

Joe May, Chairman and Founder of EIT, LLC considers this expansion to be "critical in our effort to continue the superior service we provide to our customers."

David Faliskie, President of EIT, LLC, commented "We are very proud of our Danville operations. Our team in Danville has demonstrated the willingness and capability to handle new and greater challenges. This expansion is a natural progression in EIT's development and we are very pleased with our progress in Danville".

EIT will hold an open house and dedication ceremony on November 18, 2011 for the new Danville facility. EIT, in its 35th year of operations, first opened a facility in Danville in 2005. The current Danville facility will be used to support EIT's cabling, wire harness, machining and sheet metal operations.

EIT, headquartered in Sterling, VA provides electronic manufacturing and engineering services for a wide variety of customers. For more information, please contact Jim Raymont at 703-478-0700.
