- Designed to be field installed and serviced!
- 4 5/8" long x 1 5/8" wide.
- ETL listed. Meets UL924, NFPA 101 Life Safety Code, NEC, OSHA

## Information

There are few expenses in this world that can repay your investment in less than one year, but the ExitRetroLED kit from Lumenosity is one item that fits the bill. For less than \$20, you can retrofit your existing exit signs with energy-saving LEDs and start saving money right away. No need to change fixtures, no need to replace bulbs every two years. We are so confident in our design that we offer a 5-year Unconditional Warranty for these kits.

Our LED "bulb" is based on cutting-edge LED technology from the world's most advanced suppliers, and it offers far superior temperature/lifetime performance ratings than any other manufacturer currently available. This powerful combination allows for a much wider safety margin for long life, more light, and comes with 3 sizes of bases so that nearly ANY sign can be compatible.

Red letters and 120V operation is standard, but 277V and/or green letters are also available via special order.

## Energy Savings Analysis

<u>Light Source</u>	<u>Wattage</u>	<u>Lifespan Hrs./Yrs.*</u>	<u>Annual Energy Use</u>	<u>Annual Operating Cost + Maintenance @.13k/KW-H</u>
Incandescent	2 x 15W	17.5k / 2	263 kW-H	\$ 34.19
LED	2.8W	50k / 5+	12 kW-H	\$ 3.25

*\*Calculations assume 24hrs operation/day. Further savings are realized with reduced maintenance costs due to long life of LEDs and glass breakage issues.*
